--> Comment Text :

I am totally opposed to the Yucca Mountain site for nuclear waste storage. I grew up in Newport News, Virginia, our electrical power came from the Surrey Nuclear Power Plant. I have no problem with Surrey or other nuclear plants but I do have a problem with the hauling and storing of the waste (2611 miles NN to LV) from where it started. How can you guarentee that you can get it across the country safely and better yet how can you guarentee that it will stay in those container for 300 years without leaking? How can you guarentee that a earthquake will not damage the storage facility? In Nevada and Utah there are the "Down Winders" people who constantly are being diagonised with cancers. Area 51 with it's bomb testing of the 30's - 90's are still poisoning people. Why, continue to contaminate this state? Is it because our population is so low that we're worth the risk. I think not! If a nuclear plant creats radioactive waste products than it should have to stored them and if they cannot the states that
